

Brainstorming & Idea Prioritization

1. Brainstorming & Ideation | Credit Card Approval Prediction

Prepared For	Prepared By	Domain	Date
Credit Card Approval Prediction	Ankitha Vana	Finance	July 1, 2026

Brainstormed Ideas

Idea	Description	Impact	Feasibility
Eligibility prediction form	A form where analysts or applicants enter profile details and receive approval/rejection output.	High	High
Batch screening	Upload multiple applicant records and flag likely high-risk profiles.	High	Medium
Model comparison dashboard	Compare Logistic Regression, Decision Tree, Random Forest, and XGBoost metrics.	Medium	High
Cloud deployment	Host best model as an IBM Watson Machine Learning endpoint.	High	Medium
Explainability notes	Show key risk indicators that influenced the prediction.	Medium	Medium

Prioritized Scope

- Priority 1: Clean and merge applicant and credit history datasets.
- Priority 2: Engineer approval labels and encode categorical inputs.
- Priority 3: Train and compare four classification algorithms.
- Priority 4: Save the best-performing model and integrate it into Flask.
- Priority 5: Prepare IBM Watson Machine Learning deployment for scalable prediction.

Selected Use Cases

Scenario	User	Outcome
Automated application screening	Bank credit analyst	Instant prediction helps prioritize applications for further review.
High-risk applicant identification	Compliance officer	Past-due records are translated into risk labels for eligibility review.
Self-service eligibility check	Prospective customer	User understands likely approval status before submitting a formal application.
