

Customer Journey Map

2. Requirement Analysis | Credit Card Approval Prediction

Prepared For	Prepared By	Domain	Date
Credit Card Approval Prediction	Ankitha Vana	Finance	July 1, 2026

Journey 1: Bank Credit Analyst

Stage	Action	System Support	Expected Experience
Login / Open App	Analyst opens the prediction interface.	Flask home page loads input form.	Simple and quick start.
Enter Applicant Data	Income, employment, education, housing, and credit signals are entered.	Form validates required fields.	Reduced manual paperwork.
Submit	Analyst requests prediction.	Preprocessing pipeline transforms inputs.	Immediate response.
Review Result	Analyst sees approval/rejection prediction.	Model returns a clear classification.	Confident prioritization for next review.

Journey 2: Prospective Customer

Stage	Customer Action	System Response
Eligibility Check	Customer enters personal and financial details before formal application.	App predicts likely approval status.
Result Review	Customer reads the prediction output.	System presents an easy-to-understand decision label.
Next Step	Customer decides whether to improve profile or apply formally.	Application rejections and unnecessary submissions are reduced.

Pain Points Addressed

- Long waiting time for application review.
- Inconsistent manual review decisions.
- Difficulty identifying applicants with overdue credit records.
- Limited visibility for customers before applying.
