

No. of Functional Features Included in the Solution

5. Project Development Phase | Credit Card Approval Prediction

Prepared For	Prepared By	Domain	Date
Credit Card Approval Prediction	Ankitha Vana	Finance	July 1, 2026

Functional Feature Count

The solution includes functional features across data processing, model training, model serving, and user interaction.

Feature Inventory

No.	Feature	Description	Status
1	Dataset loading	Read applicant and credit history CSV files.	Planned/Implemented
2	Duplicate removal	Remove repeated applicant records.	Planned/Implemented
3	Missing value handling	Clean incomplete records before training.	Planned/Implemented
4	Dataset merging	Combine application and credit records.	Planned/Implemented
5	Feature engineering	Create risk labels and model-ready features.	Planned/Implemented
6	Categorical encoding	Convert text categories into numeric features.	Planned/Implemented
7	Model comparison	Train and compare four ML algorithms.	Planned/Implemented
8	Model persistence	Save best model for reuse.	Planned/Implemented
9	Prediction form	Collect applicant details through web UI.	Planned/Implemented
10	Result display	Show Approved or Rejected output.	Planned/Implemented
11	Cloud deployment path	Prepare IBM Watson ML scoring endpoint.	Optional

Expected Input Fields

- Income type, education type, family status, housing type, employment days.
- Credit payment status or summarized overdue behavior.
- Optional features such as age, number of family members, occupation type, and total income depending on dataset columns.
