

Demonstration of Proposed Features

8.Project Demonstration | Credit Card Approval Prediction

Prepared For	Prepared By	Domain	Date
Credit Card Approval Prediction	Ankitha Vana	Finance	July 1, 2026

Features to Demonstrate

Feature	How to Demonstrate	Success Indicator
Applicant input form	Enter income type, education, family status, housing type, employment days, and credit indicators.	Form accepts valid values.
Prediction result	Submit the applicant form.	System displays Approved or Rejected.
Model reuse	Restart Flask app and submit another profile.	Saved model loads and predicts without retraining.
High-risk detection	Use an applicant profile with overdue credit status.	System flags likely rejection/high risk.
Cloud readiness	Show deployment plan or Watson ML scoring call.	Model can be served as an endpoint.

Scenario-Based Demo

- Scenario 1: Bank analyst screens a new applicant and receives instant prediction.
- Scenario 2: Compliance officer reviews high-risk credit history records for rejection likelihood.
- Scenario 3: Customer checks eligibility before formal credit card application.
